1. A decorative shade for a video display that has a screen, the decorative shade comprising:

a window (10) being a rectangular frame and having an opening (12) that is adapted to align with the screen when the window (10) is mounted on the video display;

a front face with an outer edge;

a rear face with an outer edge common to the front face;

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose a decorative shade for a video display comprising a rectangular frame having an opening and flanges adapted to surround the exterior of the video display and comprising a rolling device attached to the inner surface of one of the flanges having a roller, driver, and a blind wound on the roller having a picture thereon.
